### **DETAILED ACTION**

This action is in response to papers filed on June 15, 2001.

#### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 10-13 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claims 8 and 12 state transmitting a product that is compatible with a pet. How does the computer know what product to transmit? What is the identification of the product? How does it determine that the product has the same indicia as the pet?

#### ***Claim Rejections - 35 USC § 101***

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 1-9 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.
3. The basis of this rejection is set forth in a two-prong test of:
  - (1) whether the invention is within the technological arts; and
  - (2) whether the invention produces a useful, concrete, and tangible result.

4. For a claimed invention to be statutory, the claimed invention must be within the technological arts. Mere ideas in the abstract (i.e., abstract idea, law of nature, natural phenomena) that do not apply, involve, use, or advance the technological arts fail to promote the "progress of science and the useful arts" (i.e., the physical sciences as opposed to social sciences, for example) and therefore are found to be non-statutory subject matter. For a process claim to pass muster, the recited process must somehow apply, involve, use, or advance the technological arts.

In the present case, claims 1-9 do not involve the use of a computer system. The steps of the above mentioned claims can be performed in a manual process.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-13 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent 6 358 546 B1; Bebiak et al; Methods for Customizing Pet Food; filed Jan. 14, 1999.

7. As to claim 1 Bebiak teaches

a. assigning codes based on predetermined breed code(C. 3. I.8-10)

- b. categorizing a product according to breed code(C. 3 I. 27-30)
  - c. Publishing code and categorization(C. 3 I.33-35)
8. As to claims 2 and 4 Bebiak teaches factors assigned to input criteria
9. As to claims 3 and 5 Bebiak teaches factors being values.(C. 3 I. 67; C. 4 I. 1).
10. As to claims 6 –7, 9, 11 and 13 Bebiak teaches a means for creating an indicia on the package(C. 6 I. 1-7)
11. As to claims 8, 10 and 12 Bebiak teaches matching the product with the pet(C. 5 I. 55-60).

### ***Conclusion***

12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Foreign Patent JP2001209753 A. A method to obtain the appropriate dog food for a dog have a specific disease. Non-Patent literature [www.iams.com](http://www.iams.com); retrieved from wayback machine March 3,2000 anylinkage, shows matching the type of pet with the corresponding dog food.
